Thanks for supporting us! You're awesome!

Please respect our license terms by not *sharing* or selling the files or prints.

Commercial licenses are available if you want to print and sell the terrain.

Key concepts

The Rocket Launch Facility has two categories:

- Frame
- Rocket

The frame functions like most buildings and gantry models from the Flatline City terrain series and has OpenLock Sockets for connectivity to other models in the range. You should refer to their respective instructions for more comprehensive instructions.

The Rocket is a modular terrain piece that is made up of vertically stacked sections which include rocket boosters, hull sections, hatches and internal flooring.

Stacking Rocket Sections

Notice the pegs that slot into sockets on each rocket section, this allows for stacking sections in a combination of your choosing.

Internal Flooring

These are places in between rocket sections

Removable Hatches

Doors slot into the grooves in compatible sections.
